

FULLSTACK SOFTWARE DEVELOPER

Professional Summary

Fullstack Engineer with 6+ years of proven expertise building and scaling production-ready web applications end-to-end. Highly proficient in JavaScript and TypeScript, with deep experience across modern frontend frameworks (React, Next.js, Vue, Nuxt) and backend ecosystems (Node.js, Express, Fastify, Nest.js). Strong track record in architecting and optimizing APIs, microservices, and database-driven applications using PostgreSQL, Prisma, Sequelize, Drizzle, TypeORM, and MongoDB, with additional exposure to CockroachDB and Cassandra. Skilled in cloud-native deployments leveraging AWS, Linode, and Coolify, and experienced with containerization, orchestration, and DevOps pipelines using Docker, Kubernetes (K8s), Jenkins, Terraform, and Datadog. Known for writing clean, scalable, and maintainable code, solving complex technical challenges, and driving successful delivery of mission-critical applications in fast-paced environments.

STRENGTHS AND EXPERTISE

- Programming & OOP: JavaScript (ES6+), TypeScript, Python | Strong in Object-Oriented Design & Scalable Architecture
 - Frontend Development: React.js, Next.js, Vue.js, Nuxt.js, Tailwind CSS, Chakra UI, Radix UI | Expert in Responsive, Accessible & Scalable UI Development
 - Backend Development: Node.js, Express.js, Fastify, Nest.js, REST APIs, GraphQL APIs | Skilled in High-Performance API & Microservice Development
 - Databases & ORMs: PostgreSQL, MongoDB, CockroachDB, Cassandra, Prisma, Sequelize, Drizzle, TypeORM, Kysely | Experienced in Data Modeling, Query Optimization & Distributed Systems
 - Environment & Deployment: Node.js, Deno.js, AWS, Linode, Coolify | Hands-on in Cloud-Native Deployment & Serverless Architectures
 - DevOps & Infrastructure: Docker, Kubernetes (K8s), Jenkins, Terraform, Datadog | Proficient in CI/CD, Monitoring & Infrastructure as Code
 - Testing & Quality Assurance: Jest, Cypress, Unit & Integration Testing, Code Reviews | Strong Debugging, Reliability & Performance Optimization Skills
 - Tools & Workflow: Git/GitHub, Agile/Scrum, Remote Collaboration | Focused on Clean, Maintainable & Collaborative Development
 - Core Strengths: Problem-Solving, Analytical Thinking, Scalable Solution Design, Cross-Functional Teamwork
-

PROFESSIONAL EXPERIENCE

Nigeria

December 2025 - Present

Full Stack Software Developer - GoClickHub

Accomplishments:

- Built and scaled Videodual, an AI-powered video collaboration app handling real-time media streaming, AI analytics, and multi-user sessions.
- Designed and implemented frontend features with React.js, Next.js, and Vue.js, ensuring responsive, accessible, and performant user experiences across devices..
- Engineered database layer with PostgreSQL + Prisma + Drizzle, optimizing queries and ensuring scalability for thousands of concurrent users.

- Automated CI/CD pipelines with Jenkins and Terraform, and integrated Datadog for performance monitoring and alerting.
- Collaborated with product & UX teams to translate Figma mockups into production-ready features, maintaining a clean, scalable, and testable codebase.
- Drove Agile sprints from MVP to release, cutting deployment cycles by 40% and accelerating feature delivery

Software Developer - Cinfores Limited

September 2023- February 2024

Nigeria

Accomplishments:

- Developed and deployed PayPanel, a secure fintech platform, using React.js, TypeScript, Node.js, and GraphQL, ensuring robust payment processing, authentication, and transaction security.
- Architected and delivered a Task Management System with React.js and Node.js, enabling scalable task assignments, real-time tracking, and distributed collaboration.
- Designed and implemented a Human Resource Management System with React Query, Redux, and Spring Boot backend, supporting employee data management, payroll automation, and access control.
- Leveraged PostgreSQL and MongoDB with Sequelize and TypeORM for schema design, migrations, and query optimization.
- Integrated REST APIs alongside GraphQL endpoints to improve interoperability and reduce frontend complexity.
- Ensured production readiness with unit & integration testing (Jest, Cypress), thorough debugging, and manual QA cycles.
- Collaborated cross-functionally (product, UX, backend teams) to ship features on schedule, applying OOP principles and clean architecture for long-term maintainability.
- Deployed on AWS and Docker-based pipelines, gaining hands-on exposure to containerization and CI/CD practices

Software Developer - Devheads

December 2022 - November 2024

USA

Accomplishments:

- Delivered consultancy for multiple US-based startups, building and scaling web applications across fintech, SaaS, and e-commerce domains.
- Developed frontend solutions with React.js, Next.js, and Vue.js, focusing on performance, accessibility, and responsive UI across devices.
- Built and maintained backend services using Node.js, Express.js, and Nest.js, implementing REST & GraphQL APIs for payments, authentication, and third-party integrations.
- Designed and optimized PostgreSQL and MongoDB schemas, applying Prisma and Sequelize for efficient data modeling, migrations, and query performance.
- Implemented CI/CD pipelines with Jenkins and GitHub Actions, improving deployment speed and reducing release errors.
- Containerized applications with Docker and deployed to AWS (EC2, S3, RDS, Lambda) for scalability and reliability.
- Collaborated with cross-functional, distributed teams (design, QA, product managers) to deliver features on time, applying Agile/Scrum methodologies.
- Conducted code reviews, unit testing (Jest), and integration testing (Cypress) to ensure high-quality, production-ready code.

Nigeria**Accomplishments:**

- Led the design and development of the software UI and company website, delivering responsive and intuitive interfaces for IoT device management.
- Built web dashboards using React.js, Angular, and JavaScript (ES6+), ensuring real-time data visualization and smooth device interactions.
- Integrated REST APIs with backend IoT services to provide device telemetry, monitoring, and control features.
- Collaborated with hardware and embedded teams to align software UI with device capabilities and user workflows.
- Implemented authentication flows and role-based access to secure IoT management tools.
- Optimized website performance and SEO, increasing visibility and user engagement for early customer adoption.
- Used MySQL and PostgreSQL for storing device data and user configurations, with a focus on reliability and scalability.
- Deployed applications on AWS and containerized environments with Docker, supporting early-stage scaling needs.
- Partnered with product and design teams to translate concepts into functional, production-ready interfaces.

Software Developer - Astella**March 2018 - September 2019****Nigeria****Accomplishments:**

- Modernized and maintained the official hospital web platform, building responsive interfaces with React.js and later adopting Chakra UI to accelerate UI development.
- Carried out SEO optimization and performance audits, improving visibility, search ranking, and page responsiveness.
- Introduced automated testing workflows (Cypress) for new features, strengthening reliability and reducing regression issues.
- Partnered with the IT and medical staff to deploy updates, resolve platform issues, and align new features with healthcare operations.
- Ensured compliance with accessibility standards (WCAG) to deliver inclusive digital healthcare services.

LEADERSHIP & COMMUNITY IMPACT

Web Development Trainer	2020 – Present
• Trained and mentored high school and college students in modern web development with a focus on React.js, TypeScript, and UI frameworks, building a strong foundation in frontend engineering. • Designed structured lesson plans and hands-on projects, enabling students to build portfolio-ready applications and gain practical coding experience. • Guided learners in applying clean code practices, version control (Git), and collaborative workflows, preparing them for professional software environments. • Organized workshops and coding bootcamps tailored to beginners and intermediate learners, ensuring inclusive, accessible, and engaging learning experiences. • Mentored over 20 students, several of whom transitioned into careers in technology, showcasing the impact of effective guidance and collaborative learning.	

EDUCATION

• Bachelor of Engineering (B.Eng), Electronics and Computer Engineering, Offshore University of Port Harcourt	2018 – 2023
• Certified Software Developer Intern, Cinfores Limited	6 months
