SENIOR FULLSTACK DEVELOPER (TYPESCRIPT | NODEJS) | 6+ YEARS EXP.

Professional Summary

Senior Fullstack Engineer with 6+ years of experience architecting high-performance, production-ready web applications using the **Next.js**, **React**, **TypeScript**, and **Node.js** ecosystem. Proven track record of delivering scalable solutions for global startups and established firms, including optimizing database performance by 25% and leading the development of secure, AI-driven, and cloud-native applications. Expert in bridging pixel-perfect UI/UX design with robust backend logic to ensure seamless user experiences and system reliability. A dedicated mentor who has trained 23+ developers and led cross-functional teams to align technical execution with aggressive business growth goals.

STRENGTHS AND EXPERTISE

- Core Languages & Architecture:** Expert in TypeScript, JavaScript (ES6+), and Python ; specializing in Object-Oriented Design (OOD) and Scalable System Architecture to build production-ready applications.
- Frontend Engineering:** Specialist in Next.js, React, and Vue.js ; building high-performance, SEO-optimized, and accessible UIs using Tailwind CSS, Sass, and Radix UI.
- Backend & API Design:** Proficient in Node.js, NestJS, and Express.js ; architecting RESTful and GraphQL APIs with a focus on high-throughput microservices and secure data processing.
- Database & Data Modeling:** Advanced experience with PostgreSQL, MongoDB, and Supabase ; expert in Prisma ORM, Drizzle, and Query Optimization for complex distributed systems.
- Cloud & DevOps (Infrastructure):** Hands-on experience with AWS (S3, Lambda, DynamoDB), Docker, and CI/CD Pipelines ; managing containerized environments and Serverless Architectures for global deployments.
- Testing & Reliability:** Committed to code quality through Unit & Integration Testing using Jest and Cypress ; experienced in leading Code Reviews and performance tuning to ensure 99.9% system uptime.
- Leadership & Workflow:** Proven ability to lead cross-functional teams and mentor junior developers ; expert in Agile/Scrum methodologies and remote collaboration tools like Git/GitHub.

PROFESSIONAL EXPERIENCE

GoClick Hub | Senior Fullstack Engineer & Team Lead

May 2025 – January 2026

- AI Video Integration:** Led the development of a Generative AI feature allowing users to create videos using AI Avatars; increased platform engagement and user retention.
- Complete UI Redesign:** Implemented a total platform redesign using Next.js and Tailwind CSS without any system downtime or service breaks.
- UX Optimization:** Fixed critical responsiveness issues across the site, resolving 95% of mobile and tablet user complaints.

- User Preferences: Built a custom sync system to save user settings and video progress across all devices (Mobile, Web, Tablet).
- Team Leadership: Managed a team of backend and frontend devs; used Code Reviews and Agile to speed up feature delivery and reduce bugs by 30%.
- Video Infrastructure: Optimized the backend to handle high-resolution video hosting and seamless streaming for a global user base.

Devheads (USA) | Senior Fullstack Engineer & Code Lead

September 2024 - February 2025

- Code Quality Gatekeeper: Acted as the primary lead for Code Reviews, enforcing strict standards for clean code, security, and performance across the entire repository.
- IoT Infrastructure: Built and maintained the platform for a global IoT community, managing real-time data flow between cloud-connected hardware and the web interface.
- Scalable Backend: Designed high-speed Node.js and PostgreSQL architectures to handle thousands of concurrent data streams from IoT devices.
- Automated Testing: Implemented Jest and Cypress testing suites, reducing manual review time by 40% and ensuring stable deployments for critical IoT features.
- Cloud Operations: Managed containerized applications using Docker and AWS, ensuring 99.9% uptime for the community's real-time monitoring tools.
- API Development: Developed secure RESTful APIs that allowed third-party IoT devices to communicate seamlessly with the platform.

Enthernet Services | Co-Founder & Software Lead

February 2024 - Present

- Project Leadership: Spearheaded the development of diverse high-traffic projects ranging from Crypto applications to Utility tools, overseeing the full software development lifecycle (SDLC).
- Infrastructure Management: Managed and optimized VPS (Virtual Private Servers) to host production applications, ensuring high availability, server security, and automated backups.
- Crypto & Web3 Integration: Architected secure interfaces and backend logic for cryptocurrency projects, focusing on real-time data accuracy and transaction security.
- Full-Stack Ownership: Led a team of developers to build and deploy scalable utilities using Next.js, Node.js, and PostgreSQL, aligning technical features with market needs.
- Performance Monitoring: Implemented server-side monitoring and logging to maintain 99.9% uptime across all hosted client projects and internal tools.

Cinfores Limited | Frontend Engineer & Technical Mentor

August 2023 - February 2024

- Pixel-Perfect Delivery: Translated complex UI/UX designs into high-fidelity web interfaces; consistently appraised by the UI Lead for 1:1 accuracy between design and live code.
- Junior Dev Mentorship: Actively tutored and aided junior developers, conducting pair-programming sessions to solve logic bottlenecks and ensure CSS styling followed brand standards.
- Idea Lab Collaboration: Partnered with the product team in the "Idea Lab" to prototype new features, focusing on user experience and technical feasibility.
- Code Quality: Enforced clean code practices among junior peers, helping them reduce UI bugs and improve cross-browser compatibility.

Barik NewsMedia (India) | Technical Consultant

August 2020 - February 2021

- **Project Rescue:** Recruited by the Indian-based leadership to stabilize a complex News/Media SaaS platform; identified and fixed critical React performance bottlenecks and state management bugs.
- **Production Readiness:** Overhauled the codebase to ensure the platform was "launch-ready," implementing lazy loading and SSR (Server-Side Rendering) to handle high-volume traffic.
- **Scalable Component Design:** Redesigned the frontend architecture for better reusability, ensuring the UI stayed consistent and fast across thousands of daily news updates.
- **International Collaboration:** Worked directly with the Indian engineering team to establish high-quality coding standards and streamlined the deployment process.

Nanohertz (IoT Startup) | Fullstack & DevOps Engineer

March 2018 - September 2019

- **Backend & Infrastructure Shift:** Transitioned from Frontend to lead Node.js backend development and DevOps as the engineering team scaled; took full ownership of server architecture and API reliability.
- **IoT Data Management:** Built and optimized backend systems to process real-time data from IoT hardware, ensuring low-latency communication between devices and the web dashboard.
- **DevOps & Hosting:** Managed the end-to-end deployment pipeline using Docker and cloud hosting providers, ensuring 99.9% uptime for the startup's core software services.
- **Frontend Foundation:** Originally built the initial responsive web interface for the IoT platform, establishing the design system and component library used by subsequent frontend hires.
- **Cross-Functional Collaboration:** Worked as a core member of the software team to align hardware data protocols with web-based user controls and real-time monitoring features.

LEADERSHIP & COMMUNITY IMPACT

Web Development Trainer

2020 – Present

- **Senior Technical Instructor & Mentor:** Spearheaded professional training programs at Wedigraf (Remote), TechieHive, and Bueze Tech Hub, mentoring a diverse cohort of IT students, business professionals, and aspiring developers.
- **Professional Career Coaching:** Successfully mentored 23+ developers, guiding them from foundational concepts to securing professional roles in the tech industry through hands-on project-based learning.
- **Curriculum Engineering:** Developed and delivered comprehensive roadmaps for the T3 Stack (Next.js, TypeScript, Prisma) and Fullstack Architecture, focusing on "production-ready" coding standards.
- **Cross-Industry Training:** Specialized in training business professionals on leveraging modern web tools for digital transformation and high school students on the fundamentals of logic and design.
- **Technical Workshops:** Organized and led intensive coding bootcamps, teaching collaborative workflows, Git/GitHub, and Agile methodologies to prepare students for international remote work environments.

EDUCATION

- Bachelor of Engineering (B.Eng), Electronics and Computer Engineering, Offshore University of Port Harcourt **2018 – 2023**
- Certified Software Developer Intern, Cinfores Limited **6 months**
